Online SEND training for parents and practitioners

This course developed by NCC in collaboration with other local agencies gives learners a foundation knowledge and understanding of SEND for children and young people age 0-25.

It has been designed to support the professional development of those who work, or are training, in the field of SEND. It is also a useful tool for parent carers and anyone interested in developing their knowledge and understanding of SEND.

NB: The course is not configured for mobile devices.

Patch working

During the Autumn term we will be establishing a patch based system for liaison with schools. This will mean schools will have a specific contact person for the service and the opportunity to discuss school based interventions and potential referrals to our service.

Schools will be contacted at the end of the summer term with more details

Service Changes

As a result of the independent review some service changes have been agreed with the Local Authority and NHS Commissioners. There will be changes to the following service elements in September

Drop-ins

These are being redesigned to enable pre-school children not in a setting to access formal screening.

Access and Referral

The referral process is being revised to ensure that there is clear evidence of an identified and persistent SLCN when a child is referred—this is to enable the right children to access the service

See below for events to help you decide which SLCN screens and early interventions suit your setting

Market Place Events

The service is running some market place event for settings/schools to find about SLCN screens and interventions they can use as the first cycle of assess plan do review.
